**POLICY**

It is the policy of the Cal Poly Pomona Foundation, Inc. and the College of Agriculture to establish and maintain a reasonable animal herd size on the Cal Poly Pomona campus. Present acreage and the amount of irrigation available, as well as budgetary constraints influence the number of mature breeding stock which are acceptable for instruction and research purposes.

**PROCEDURES**

Any formal requests for significant changes in the herd and flock size would have to be made in writing to the Board for review during the annual budget process or through Foundation Management at the time changes in the herd size are made or anticipated. Foundation Management will notify the Board of any changes made outside of the annual budget review process.
